SUBJECT: Enviro-Chem Superfund Site
Monthly Progress Report Number 22
May 15, 1995 through June 14, 1995

This Monthly Progress Report has been prepared in accordance with Section XII of the Consent Decree entered September 10, 1991, Number 83-419 C, U.S.D.C. District of Indiana.

Activities

The May site inspection was conducted by de maximus inc. on May 5, 1995. The following conditions were noted:

- The site fences, gates and locks are secure.
- Rainwater is standing on the decontamination and wastewater storage pads, and the southern concrete pad.
- Trash and sediment that have washed into the Parcel 45 north diversion channel upstream from the culvert at the northwest gate have been cleaned out on April 28, 1995. The trash and sediment were placed on a visqueen sheet adjacent to the channel, and covered with visqueen sheeting.

In a June 6, 1995 letter, U.S. EPA approved the Central Support Zone Investigation plans and the responses to U.S. EPA's comments as submitted by DEI on April 14, 1995. U.S. EPA also provided three additional comments on the aforementioned response letter.

On June 13, 1995, DEI submitted written responses to U.S. EPA's additional comments on the CSZI.
